ABOUT ME

Data Analyst with hands-on experience across business operations, procurement, supply chain coordination, and export operations. Skilled in Power BI, SQL, Excel, and Python for data-driven reporting, with experience in vendor coordination, farmer/buyer data management, exhibition planning, and ERP systems.

EXPERIENCE

Data Analyst | Shastika Global Impex Pvt Ltd • Mar 2026 – Current

Data Analysis & Business Reporting

- Verified, cleaned, filtered, and maintained 2,000+ farmer records, ensuring data accuracy and consistency
- Prepared business reports and operational dashboards using Excel and Power BI

International Market Research

- Conducted international market research to identify and verify potential fresh-produce importers and buyers
- Developed and maintained lead databases to support business development and buyer outreach

Export, Packaging & Logistics Operations

- Reviewed product specifications and calculated container/pallet requirements for shipment planning
- Supported export operations through shipment, packaging, and documentation coordination

Business & Technology Operations

- Managed farmer and vendor data and gathered ERP requirements for system development
- Collaborated with stall designers and supported Agri Index 2026, engaging farmers across Tamil Nadu and other states

INTERNSHIP EXPERIENCE

Data Analytics Intern | iViewsense Pvt Ltd • Jul 2023 – Jul 2024

- Worked with real-time datasets to develop comprehensive reports and dashboards
- Applied data cleaning, preprocessing, and visualization techniques
- Generated actionable insights for client campaigns using Power BI and Excel

PROJECTS

Shastika Global Impex ERP System | React, Node.js, PostgreSQL

- Implemented role-based access control, session timeout, and audit logging; built modules for Quality Control and Container Loading/Dispatch

Attendance Management System | React, Node.js, MySQL

- Built a full-stack attendance tracking application with automated percentage calculations and reporting dashboards

Malware URL Detection | Python

- Developed a system to classify malicious URLs using data preprocessing and detection algorithms
