ABOUT ME

Data Analyst with a strong focus on transforming data into meaningful insights. Skilled in Power BI, SQL, and Python, with hands-on experience in analyzing business data, improving reporting efficiency, and supporting data-driven decision-making. Passionate about solving real-world problems and continuously learning new technologies.

EDUCATION

B.Tech – Information Technology | CGPA: 8.36 / 10

Sri Shanmugha College of Engineering and Technology • 2021 – 2025

SKILLS

Data Analysis: Power BI • Tableau • Excel

Programming: Python • Java

Databases: MySQL

Web Development: React • HTML • CSS • JavaScript

Tools: VS Code • Google Workspace

EXPERIENCE

Data Analyst | **Shastika Global Impex Pvt Ltd**

On - site • *Current Role*

- Analyze complex business data to identify trends and actionable insights
- Perform data cleaning, validation, and transformation for accurate reporting
- Collaborate cross-functionally to understand requirements and deliver dashboards
- Automate recurring reporting tasks using scripts to improve efficiency
- Monitor KPIs and provide recommendations to optimize business processes

INTERNSHIP EXPERIENCE

Data Analytics Intern | **iViewsense Pvt Ltd**

Remote • *Jul 2023 – Jul 2024*

- Worked with real-time datasets to develop comprehensive reports and dashboards
- Applied data cleaning, preprocessing, and visualization techniques
- Generated actionable insights for client campaigns using Power BI and Excel
- Maintained documentation for data workflows and reporting processes
- Assisted senior analysts in performance analysis and predictive modeling

PROJECTS

Attendance Management System

- Built a full-stack attendance tracking application using React, Node.js, and MySQL
- Developed dashboards for daily, weekly, monthly, and yearly attendance reporting
- Implemented search and filter functionalities for quick access to student data
- Automated calculation of attendance percentages to improve accuracy
- Enhanced reporting efficiency, reducing manual errors and time spent

Malware URL Detection

- Developed a system to classify malicious URLs using Python and data preprocessing
- Cleaned, transformed, and validated datasets for accurate prediction
- Applied algorithms to improve detection accuracy and minimize false positives
- Generated insights from threat data to strengthen cybersecurity measures
- Improved malware detection workflow, aiding safer browsing for users

CERTIFICATIONS

Data Analytics using Power BI — *Professional Training*

Built dashboards, data models, and business insights using Power BI.

Python Full Stack Course — *Udemy*

Covered Python, backend logic, and web development fundamentals.

Associate Data Analyst — *DataCamp*

Focused on data cleaning, analysis, and visualization techniques.

Cloud Computing Certification — *NPTEL*

Learned cloud fundamentals, deployment models, and services.

Let's connect and build something meaningful together.
